

FAQ

- **I am getting a failed to import error when I try to import Cloudera into Virtual Box?**

The PC BIOS needs to be set to allow virtual technology.

- **My screen keeps freezing even though virtual machine is in 'running state'?**

Often times the virtual machine takes time to finish booting. If it takes more than five minutes try restarting the virtual machine.

- **A message keeps saying that name mode is in safe mode so the file cannot be created?**

After opening the Virtual Box, right click on the VM and look for "Normal Start."
